ABOUT ME

A budding Software Engineer looking out to take a challenging role as a Front-End Web Developer in a dynamic institution where I can build on my programming knowledge, enhance my technical skills and fulfill my leadership potential by providing quality service to the company, and ultimately myself.

WORK EXPERIENCE

Frontend Web Developer

Feb 2022- Current - Lagos, Nigeria

YEBOX
- Implemented user interface of websites using WordPress, HTML, CSS, and JavaScript to enhance online visibility.
- Modified second version of company website to foster better user experience.
- Replicated Figma designs into animated, responsive web pages and web app using Reactjs, and Nextjs in typescript.
- Ensured components were written to allow for reusability and DRY code thereby increasing the longevity of the product.
- Used tailwind, material Ui, BEM, Emotions, Styled Component, etc to create visual appealing and responsive websites.

Frontend Web Developer

April 2021- Dec 2021 - Lagos, Nigeria

TIIDELAB
- Designed and developed user interface of websites using figma, HTML, CSS, and JavaScript to enhance visibility.
- Wrote Software Requirement Specification & Functional Requirement Documents for different products before building them to ensure the features and process are well documented.
- Thoroughly tested projects on multiple browsers and devices to confirm cross-browser compatibility, accessibility, and responsiveness thereby improving the user experience.

PROJECTS/VOLUNTEERING   June 21- Current

HealthXP
- Designed desktop view, user flow of the web design using Figma.
- Replicated Figma files (company's Landing page) into animated, responsive web pages using Reactjs to enhance virtual presence.

Built the event page for a product (Sabimech) that links drivers with car repairers thereby increasing the visibility and interactions on the website.

Dashboard- First dashboard using reactjs and CSS to test my layout creativity.

Calculator- A web app that helps users perform basic mathematical operations such as Addition, Subtraction, Multiplication, Division, and simple interest using JavaScript and CSS.

Flip Card Memory Game – A web game that checks human retention power. Built with JavaScript and CSS.

Contributed to reactjs open-source projects during Hacktoberfest.
